### REAL VARIETY IN RINGING.

By the steady advance which is being made in the art and the enterprise of one or two 'explorers,' ringers to-day have a choice of methods which even within the memory of some who are still of middle age, was undreamt of. What is more, variety is being added for those who care to avail themselves of it, by such manipulation of old methods as would have made the past generation shudder. The mixing of Oxford and Kent Treble Bob, such as has been designated Worcester, and the freakish system by which such variations as Granta are produced are almost enough to make bygone ringers, such as Haley and Johnson, turn in their graves. Such adaptations of old methods may improve the music and relieve the monotony of a certain type of peals, and for this reason, perhaps, may be welcomed by some, although it has been argued by others that they reduce the musical effect by eliminating the contrasts which are obtained when the tenors are brought together after having been temporarily parted. But whatever their value, we doubt very much if such 'mongrel' arrangements will appeal very widely to the general body of ringers.

What we should prefer to see is a genuine effort made to extend ringing in a larger number of the higher methods. There are many bands efficient in the lower methods who have yet left Surprise ringing untouched, and there are many who are competent Surprise ringers who limit their practice to about four or five methods. Ringers seem to get too easily into a groove, and, having rung Superlative, Cambridge and London, with, perhaps, Bristol added, are content. There are many other Surprise methods, not all as difficult, perhaps, but certainly well nigh, if not quite, as interesting. Why is it Major bands do not seek them out and ring them? There are at least half a score of good Surprise methods, beyond those mentioned, in existence, with peals already composed, but very few bother to practise them. The Leiston band, in which the members of one family very largely predominate, is a shining example of what may be done to introduce variety into the ringing of higher methods, and it would be well if more companies would emulate them.

Some day, we suppose, the Central Council will publish a collection of Surprise methods, although at the present rate of progress many years will pass over our heads before it appears. Apart from the handicap of funds wherewith to publish such a work, the Surprise methods would, in the natural order of things, be the last of the sequence, and at present even the plain methods are pigeon-holed, while the Treble Bob methods remain to be worked out. This latter is a prodigious undertaking, for not only

have the methods themselves to be set down on paper from the formulæ from which these things are obtained, but they have to be proved. Then, when it is remembered that few men are capable of the task and that fewer still have the time to devote to it, it will be seen that the collection of eight-bell Surprise methods is likely to be a thing of the very distant future. In the meantime, however, there is no reason why Surprise ringing should be limited almost entirely to the four methods named above.

## DEATH OF MR. S. G. HODGES.

A DORSET WORTHY.

It was with sincere regret that his many friends in Dorchester and district heard of the passing away of Mr. Sydney George Hodges. This well-known and esteemed Dorsetshire for more than 30 years carried on the business of electrical and general engineer, and on his retirement seven years ago, went to live with his son, who has a drapery business at North Cadbury, Somerset. It was here that the deceased breathed his last on May 29th, at the age of 72.

During his residence in Dorchester, Mr. Hodges was a keen and enthusiastic ringer. For some years he was the popular captain of St. Peter's belfry, and in those days change ringing was little practised in the county. Although he had then reached over 50 years nothing daunted him. His ambition was that St. Peter's should be a change-ringing society, and with the advent of Mr. Geo. White (the present Ringing Master of the Dorchester branch of the Salisbury Guild) his ambition was fulfilled, for on February 4th, 1902, the first peal (Grand-sire Triples) rung in the county by a local band was an accomplished fact at St. Peter's, Dorchester. 'Like father like son,' was exemplified on that occasion, for Mr. Hodges and his two sons rang in the peal. Altogether he rang four peals in his beloved tower of St. Peter's, and made several attempts in this and other towers in the county. He also mastered Stedman, Treble and Plain Bob, and was a very fine striker. He was great at raising and falling in peal, and always took the lead. Throughout his long connection, it was a joy to him to be in the tower, either to ring for Sunday service or practice. He attended regularly the quarterly meetings of the Dorchester branch of the Salisbury Guild, and was known as the 'Father' of the branch. He was the means of effecting considerable improvements in the ringing chamber of St. Peter's, which is regarded as being one of the most comfortably arranged in the Diocese. He was the donor of a fine peal board which takes up one side of the chamber, for recording the peals rung in the tower, surmounted by artistic wrought iron work, and has been commented on by visitors to the belfry, and in 'The Ringing World.' He also gave a peal of handbells and several books and works on campanology. In addition, he made a hand rail of steel piping from the bottom of the tower to the belfry door. This work he was very proud of, for no doubt it was 'well done,' and has proved a great boon to the ringers while ascending and descending the tower.

A lovable man of genial disposition the deceased made a host of friends, by whom much sympathy is extended to his four sons, three of whom are in Canada.

Mr. Hodges took great interest in his lodge of Oddfellows, as well as in bell ringing.

The mortal remains were taken to Dorchester and laid to rest by the side of the late Mrs. Hodges. The St. Peter's ringers paid a last tribute to the memory of their revered comrade by attending the funeral, sending a beautiful wreath, and ringing muffled touches on the bells.

## YORKSHIRE ASSOCIATION.

NORTHERN DIVISION.

A most successful quarterly meeting of the Northern Division of the Yorkshire Association was held at Robin Hood's Bay on Saturday, June 4th. Considering the difficulties of train service the meeting was fairly well attended, Pickering, Helmsley, Thornaby, and Scarborough being the chief towns represented. By the kind permission of the Rev. J. W. E. Walker, Vicar of Robin Hood's Bay, the bells of the Parish Church were available during the afternoon and evening, the visitors making good use of the privilege, several touches in the popular methods being enjoyed by all. In the absence of the Rev. J. W. E. Walker through illness, the Rev. E. Drage, vice-president of the Association, conducted a short service in the church. In his helpful address, the vice-president not only expressed his own appreciation of the ringers' work, but pointed out the great opportunity for good that was given them in the execution of their art.

An excellent tea was provided in the Church Hall by the lady ringers of Robin Hood's Bay, and a business meeting followed.—The Chairman, the Rev. E. Drage, expressed his regret on hearing that Mr. T. W. Robbins, of Helmsley, a member of the District Committee, as well as the General Committee of the Yorkshire Association, was leaving the district. Since the re-organisation of this Northern District, in March, 1920, Mr. Robbins has done much to help the ringers, not only in his own tower, but in the neighbouring parishes as well. Pickering ringers in particular will miss his cheerful and ready help.—Mr. Alexander, of Robin Hood's Bay, was elected to take the place of Mr. Robbins on the General Committee.

The ringers had great pleasure in electing the Rev. C. Hone, Vicar of Whitby, and the Rev. J. W. E. Walker, Vicar of Robin Hood's Bay, as honorary members of the association. Three ringing members were also elected.

In view of a possible amalgamation between the Cleveland and North Yorkshire and the Yorkshire Association, it was decided to leave the fixing of the place and date for the next meeting in the hands of the District Committee.

The meeting concluded with a vote of thanks to all who so kindly helped to make the day a great success.

## 'GANNY GUNTER' MAJOR.

Once upon a time there was a band of ringers in a beautiful country village. They had been well taught, could ring and strike all the Standard Methods, and were content. Their knowledge did not include Little Bobs, and the now well-known means of eradicating the faults in the methods they rang, yet they were happy.

By some chance an 'Expert' hit upon this spot to spend his well-earned holiday. He announced his coming, and an attempt for a peal of Double Norwich was arranged in his honour.

The eventful day arrived, and the great man asked the conductor to show him the composition, on which the following was produced for his inspection:—

5376	Double Norwich Major.
23456	1 4 6
53624	— — —
36524	— — —
62534	— — —
32465	— — —
24365	— — —
43265	— — —
62345	— — —
23645	— — —

'It's a six part,' said the conductor, 'and I am calling singles in the third and sixth parts instead of the bob marked with an asterisk. I shall also omit three consecutive bobs at 6, which will make it 5152.'

'Tut, tut,' said the Expert, 'don't you know that the great fault of Double Norwich is that it apparently will not permit of exactly 5,000 changes. If this number counts as a peal, why should we ring more? Now I have discovered the means of getting rid of this blemish, and will give you a practical illustration while we are ringing this peal.'

The local men had heard that this was a great man indeed, and thought these were words of wisdom. So the Expert said he would only speak twice during the ringing, and on each occasion he would say 'Ganny Gunter.' When he said these magic words the treble must immediately make second's place and lead again, the other bells altering their work accordingly. For a few minutes he instructed them in these alterations, such as the bell starting the far places from the front must, after the dodge, go straight behind and do the last work, the bell, instead of making the near places, dodged in 3-4 and made the far places without a dodge, and so on; and then they started for the peal.

The striking was good, and it was like any other peal until the end of the second lead of the third course, when the visitor said 'Ganny Gunter.' The ringers carried out their instructions smoothly, and lo! the course end came up in four changes. Again, at the same place in another part, there was a 'Ganny Gunter,' and the course end came up as before.

Everything was going well, and only the conductor seemed to be troubled. He had already omitted three bobs at 6, and not being good at calculating mentally, was under the impression that too many changes had been cut out. Just as he reached the conclusion that the bells would come round in exactly 5,000 changes, his last single was due. His elation at the result of the 'G.G.'s' caused him to forget the change, and he shouted 'Bob,' and the peal was lost. Possibly the Expert could have saved the situation, but he had contracted only to speak twice, so could do nothing.

Then there was much discussion, not about the conductor's mistake, but on the question of 'Ganny Gunter.' The Expert said little except to remark that 'the variation from the method is so slight as to be negligible,' and on the Treble man saying that he had never made seconds before, he replied, 'The second's place is equivalent to a whole pull behind.'

Meanwhile the conductor had been trying the effect, on paper, of successive 'Ganny Gunters,' and suddenly shouted out, 'Why, it's a method.' The figures he showed were seven divisions of four changes, the following being the first five rows:—

12345678	Bob to move Treble
21436587	21436587
21345678	
12436587	24135678
14263857	

'Yes,' said the Expert, 'it's a dwarf lengthening lead method, and either fourth's or sixth's instead of the whole pull behind would be correct as a bob. To get 5,000 changes the tenors must be parted, if ordinary bobs are used. To make the parting of the tenors unnecessary you must have a bob which changes the hunt bell,' and he marked the figures to show how this could be done. He also promised them the figures of a peal if they wished to ring it in either form; and shortly afterwards he left them.

Happiness and contentment went with him: the ringers in that beautiful spot cannot now agree on many points. Various questions arise, such as does the method remain Double Norwich when a 'Ganny Gunter' is introduced, or is it a peal in two methods? Should 'Ganny Gunter' Major be rung with ordinary bobs, or is it better to

move the treble? And these questions are never satisfactorily answered, for Experts don't like to explain too much.

JOSEPH W. PARKER.

## STEDMAN.

By GEORGE BAKER.

Is it not time to recognise that Stedman is a symmetrical method and worthy of symmetrical treatment?

The earliest exponents of this interesting method created difficulties for themselves and other people by dividing it into quick and slow sizes which do not exist, the second six rows are the reverse of the first six rows, and the whole forms a complete round block, the 12th row (6432715) being a simple transposition row with the 3rd the homing bell (formerly called pivot bell), characteristics that are found in every properly constructed method, principle, or system, which has rounds for the fundamental row.

Further difficulties were created by starting peals from 2314567, necessitating the use of a scale of course-ends foreign to the round block: they were dealing with, a proceeding unheard of in other methods.

## THE METHOD.

Plain.	Bobbed.	Singled.
1 2 3 4 5 6 7	1 2 3 4 5 6 7	1 2 3 4 5 6 7
2 1 3 5 4 7 6	2 1 3 5 4 7 6	2 1 3 5 4 7 6
2 3 1 4 5 6 7	2 3 1 4 5 6 7	2 3 1 4 5 6 7
3 2 4 1 6 5 7	3 2 4 1 5 7 6	3 2 4 1 5 6 7
2 3 4 6 1 7 5	2 3 4 5 1 6 7	2 3 4 5 1 7 8
2 4 3 1 6 5 7	2 4 3 1 5 7 6	2 4 3 1 5 6 7
4 2 3 6 1 7 5	4 2 3 5 1 6 7	4 2 3 5 1 7 8
4 3 2 1 6 5 7	4 3 2 1 5 7 6	4 3 2 1 5 6 7
3 4 2 6 1 7 5	3 4 2 5 1 6 7	3 4 2 5 1 7 8
4 3 6 2 7 1 5	4 3 5 2 1 7 6	4 3 5 2 1 7 8
4 6 3 7 2 5 1	4 5 3 1 2 6 7	4 5 3 1 2 6 7
6 4 3 2 7 1 5	5 4 3 2 1 7 6	5 4 3 2 1 7 8

6 3 4 7 2 5 1      5 3 4 1 2 6 7      5 3 4 1 2 6 7

It will be seen that the 3rd is the homing bell in all three round blocks, and that the simple transposition row (5432176) is the same in both bobbed and singled round blocks, consequently the following scale of course-ends hold good for bobs or singles.

## Scale of Course-ends.

## Bobs or Singles.

S H L Q	1 2 3 4 5 6	Will run
x	6 5 3 4 2 1	2 courses
x x	6 3 5 4 1 2	5 "
x x x	6 1 4 5 3 2	3 "
x x x x	2 1 5 4 3 6	2 "
x x x	2 3 4 5 1 6	5 "
x x	1 5 4 3 2 6	2 "
x	1 2 3 4 5 6	1 "
x x	6 2 4 3 5 1	2 "
x	1 3 2 4 6 5	2 "
x x	1 6 4 2 3 5	5 "
x x x	5 6 2 4 3 1	5 "
x x x	5 3 4 2 6 1	3 "
x	1 5 4 3 2 6	2 "
x x	6 5 3 4 2 1	2 "
x	6 2 4 3 5 1	2 "

In addition, unpaired singles can be used at 1st and 10th calling positions without affecting the 7th, and when used in conjunction they produce 132465.

Single at 2nd position VI. produces 634125

Single at 9th position V. produces 452361.

Single at 11th position VI. produces 634125.

Single at 14th position V. produces 452361.

Following are two first sections of Thurstians' four-part, the first from 2314567 as heretofore, the second from rounds which is the proper and correct treatment of the method.

2 3 1 4 5 6	SHLQ	1 2 3 4 5 6	SHLQ
2 4 6 3 5 1	x x	6 2 4 3 5 1	x x
4 3 2 5 6 1	x x x	2 4 3 5 6 1	x x x
3 4 2 5 1 6	x	2 3 4 5 1 6	x

Apart from the fact that the latter version is the correct way to treat the method, there can be question which of the two versions would be more easily memorised by any young conductor.

Later on, if I can find the time, I hope to publish some original peals of my own composing, and thus make amends for the false peal published some years ago.

## A MIDLAND COUNTIES PEAL.

To the Editor.

Dear Sir.—In your issue of 25th February, 1921, particulars were published of a peal of 5040 Kent Treble Bob Major rung at Long Eaton on the 29th January, 1921, but no society was mentioned. Particulars of this peal have now been sent in to me showing it as rung for this association, and I take it, therefore, the omission of the name of the association from the published report was an error.—Yours, etc.,

A. C. WRIGHT, Hon. Sec.

Midland Counties Association.

### OXFORD DIOCESAN GUILD. NORTH BUCKS BRANCH.

The annual meeting of North Bucks Branch was held at Shenley, on Saturday, June 11th, when about 70 ringers attended, representing the following towers: Blotchley, Beachampton, Bradwell, Calverton, Chicheley, Fenny Stratford, Great Horwood, Great Brickhill, Linslade, Loughton, Maids Moreton, Newton Longville, Newport Pagnell, North Crawley, Simpson, Stony Stratford, and the local ringers. The fine weather assisted considerably towards making the meeting a complete success. Shenley is the yearly venue of North Bucks Branch for the annual meeting, and is always looked forward to by its members with pleasure, for the president (the Rev. J. R. Vincent) always makes splendid arrangements. On this occasion the meeting was honoured with the presence of the Bishop of Buckingham, who kindly accepted the invitation to address the ringers. The beautiful church was completely filled, and thanks to the Shenley choir, a fully choral service was held. The Bishop took for his text, 'That ye walk worthy of the vocation wherewith ye are called' (Ephesians iv. 1), and pointed out the essential duties of ringers towards their church.

After service, an adjournment was made to the Rectory grounds, where tea was served on the lawn.—The President proposed that three cheers be given for the Bishop of Buckingham upon his first visit to a North Bucks branch ringers' meeting. Needless to say these were enthusiastically given, and the Bishop suitably responded, and wished the branch every success.

The usual business meeting then took place. The hon. secretary presented the balance sheet, and gave a brief report of the work of the branch, which is stronger now than at any time since its formation, with 211 ringing members, 14 honorary members, and 28 towers in union.

The Rev. J. R. Vincent was again elected president, and Mr. W. Sear, secretary and treasurer. The Master (the Rev. C. W. O. Jenkyn) and the Guild secretary (Mr. R. T. Hibbert) were present, and the former expressed his appreciation of the efforts that were being made in the organisation of the North Bucks Branch. This was most gratifying and encouraging.

Mr. R. T. Hibbert gave a brief outline of the financial position of the Oxford Guild Memorial Fund, for which about £15 is still required.

The usual vote of thanks were extended to all those who had assisted in making the meeting such a complete success, and the motion was suitably responded to by all concerned.

The ringing included touches in methods ranging from Grandsire Doubles to Cambridge Surprise Minor.

### HEREFORD GUILD. BREAKING FRESH GROUND.

On Saturday week, the Clifford District of the Hereford Guild held a quarterly meeting at Peterchurch, the first in the village, and there were ringers present from Gilwern, Clifford, Eardisley, Madley, Kingstone and Clebonger, together with the Rev. G. R. M. Ellwood, of Staunton-on-Wye, the Ringing Master (Mr. C. Edwards), the District Secretary, and the local band. The Vicar (the Rev. J. H. T. Kilgour) met the ringers on their arrival, and gave them a kindly welcome. The Guild form was used at the service, at which the Vicar gave a very interesting address on the origin of bells. Mr. S. T. Rackham, of the Gilwern band, very ably presided at the organ. After the service, 23 sat down to tea, at the conclusion of which the business meeting was held, the Vicar, who occupied the chair, giving the Guild a very hearty welcome to Peterchurch. His band were only young as yet, but he hoped they would profit by the visit of so many friends, and put their backs into it, and eventually become good change ringers.

Whitney-on-Wye was chosen for the next meeting, which will mean breaking fresh land again.—The Vicar became an honorary member, and the local band, probationers of the Guild, and the Ringing Master promised to visit them and give them what assistance he could.—The usual votes of thanks terminated the meeting.

Good use was made of the bells during the afternoon and evening, rounds being rung for the learners, who included a lady of the Clebonger band, and Grandsire, Canterbury Pleasure and Stedman Doubles for the rest, the finishing touch being the first 720 of Bob Minor on the bells, by: A. A. Rackham 1, E. R. Jones (first 720) 2, Alec A. Rackham 3, S. T. Rackham 4, J. P. Hyett 5, C. Edwards (conductor) 6. This brought to an end a very successful meeting.

### LINCOLN DIOCESAN GUILD.

A meeting of the Gainsborough District was held at Corringham, on Saturday last, ringers being present from Gainsborough, Stow, Scotter, Histon, Lindsey and Bigby, in addition to the local company.

The bells were available during the afternoon and evening, and were kept going to the standard methods.

An excellent tea was provided in the Schoolroom, and the business meeting which followed was presided over by the Rev. J. Barber (Rector of Stow). Apologies for absence were read from the Rev. Canon Hicks and the Rev. A. B. Peirce.

Votes of thanks to the Vicar for the use of the bells, to Mrs. Prescott for so very kindly providing the tea, and also the Rev. J. Barber for presiding, were accorded.

## BELFRY GOSSIP.

We would like to urge upon correspondents the necessity of sending on their communications to us as early as possible, as the dislocation of posts caused by the curtailment of train services, coupled with the new suspension of any Sunday work in the post office, is causing considerable delay in the delivery of letters.

June 28th is a date which revives sad memories in connection with ringing in Coventry, for it was on that date in 1885 that the famous bells of St. Michael's Church were rung for the last time, on account of the danger to the tower. Shipway, in his 'Art of Ringing,' published in 1816, says: 'Coventry has, at St. Michael's Church, a good peal of ten bells; tenor 31 cwt. in D,' and though Shipway never probably heard them himself he was by no means over lavish in his praise. The bells were one of the glories of the city.

They were cast in 1774 by Pack and Chapman, of Whitechapel, and the tenor was recast by John Briant, of Hertford, in 1805. For eighty years the bells hung in an independent frame carried up from the ground, but when the church was restored in 1885, and the western arch thrown open, the timber cage was ordered to be removed on account of its unsightliness. With the frame, the bells had to come down, and unhappily the proposal to build a detached bell tower for them never came to fruition. Eventually they were hung for chiming only in the octagon.

Records exist of peals rung upon these famous bells, including two in 1807—one of Grandsire Cutters by the St. Martin's Youths, Birmingham, and the other, '6,140 Bobb Major Royal,' by the Society of Coventry Youths. Of those who took part in the final ringing of the bells on Sunday, June 28th, 1885, Mr. James George is the sole survivor.

The authority upon bells appointed by the Gloucester and Bristol Diocesan Association is Mr. G. H. Phillott, M.A., M.S.A., 31, Promenade, Cheltenham, and ringers in the two dioceses whose bells require attention are requested to urge their Vicar and vestry to seek his advice before placing orders or when contemplating improvements or augmentations.

Will Corpl. A. Cullum, who called a peal of Stedman Triples at St. Peter's Church, Caversham, Oxon, on May 2nd, 1921, please communicate with P. Harrison, 14, Sheffield Street, Leicester, if he is the same A. Cullum, late of the R.F.C., Aircraft Park, Lympne, during the year 1917?

## SIX BELL METHODS.

We are asked to state that the following 'regular' Minor Methods have been rung at Bucknall, and named:—

No 23.—4th's place Delight, page 19, on May 29th last, and named 'Burslem.'

No. 16.—3rd's place Delight, page 24, on May 31st last, and named 'Bucknall.'

No. 29.—Treble Bob, on June 7th last, and named 'Norton-le-Moors.'

## ROYAL CUMBERLAND YOUTHS.

### THE WAR MEMORIAL.

The Cumberland Youths War Memorial is to take the form of a mural tablet to be fixed in the tower of the Church of St. Martin's-in-the-Fields, Trafalgar Square, London. The cost of the tablet, fixing and faculty will be about £30. Towards this sum £15 2s. has been subscribed and promised, and another £15 is, therefore, required. It is strongly desired to put the work in hand as soon as possible, and members, especially country members, are earnestly invited to send their subscriptions at an early date to the hon. secretary of the society, or to the hon. secretary of the fund, Mr. H. J. Bradley, Christ Church Schools, Willesden Lane, N.W.6.

## WINCHESTER DIOCESAN GUILD.

A good attendance and an ideal day from a ringer's point of view was all that was needed to make a combined practice meeting held at Ourdridge on Saturday last, a success. The Church of St. Peter, a noble edifice which stands in the midst of what are now huge stretches of strawberry fields, is the possessor of a grand peal of bells (tenor 26 cwt. in D), which were heard to full advantage. By kind permission of the Vicar, the bells were available during the afternoon and evening, with an hour's interval for tea. The methods rung were: Grandsire and Stedman Triples, Bob, Kent Treble Bob, Double Norwich and Cambridge Surprise Major. Among those present were: Mr. G. Williams (Master), the Rev. E. Bankes James and his pupils, and members from Ourdridge, Maidstone, Portsea, Southampton (St. Mary's), North Stoneham, Upham and Wickham. It is hoped that these summer meetings which up to the present are both pleasant and successful will be frequently held up to the end of the season.

## MONKS KIRBY BELLS.

## NOBLE ADDITION TO WARWICKSHIRE PEALS.

The old parish church of Monks Kirby, Warwickshire, now possesses a magnificent ring of eight bells, one of the finest peals in the county. For many years the six old bells had hung in the tower in a dangerous condition, and could not be rung with safety owing to the decayed and dilapidated state of the wooden beams and supports, and it was found necessary to remove all the old timber, etc., and to entirely rehang the bells with new fittings in new framework. This work was entrusted to Messrs. John Taylor and Co., of Loughborough, and the bells are now a noble peal in their strong and massive iron frames on stout steel supporting girders. The fittings are of the most modern design, and contain all the many improvements that have been introduced by Messrs. Taylor, the most important, perhaps, being the patent ball bearings in which the bells swing, and everything is designed with a view to the strain placed on the structure of the tower by the thrust of the bells being reduced to an absolute minimum.

The six old bells have been tuned whilst at Messrs. Taylor's foundry, and two new trebles have been added to complete the octave. The bells are now a perfect peal, and the musical effect is very marked. The tenor, dating from 1618, note D natural, weighs between 24 and 25 cwt., and the total weight of the bells, fittings, frame, girders, etc., exceeds 15 tons.

The six old bells are very interesting, from an archaeological point of view, the smallest, dated 1640, bearing the following inscription:—

My noble founders they have been so many,  
Because not all I will not here name any.

The old 3rd bell, now the 5th of the ring of eight, is the most ancient bell of the peal, and from the marks and inscription it is probable that this bell was cast towards the middle of the 15th century. It may be mentioned, too, that this bell is supposed to have hung originally in the destroyed church of Stretton, and was at some time transferred to Monks Kirby Church.

The tower at Monks Kirby will henceforth undoubtedly prove a source of great attraction to bell ringers from all parts, furnished as it now is with such a magnificent ring of bells, and, most ideally situated in the midst of a charming country, it is likely that the village will become a great centre for campanology.

One of the most successful gatherings in the history of the Warwickshire Guild took place at Monks Kirby on Thursday, June 9th, for the dedication of the bells. The service was conducted by the Bishop of Coventry, and the church was filled. A band had been selected for the opening touch (three leads of Grandsire Triples), and was arranged as far as possible to include all the present and past officers of the Guild. It included A. Roberts (Master), E. H. Adams and J. George (ex-Masters), H. Argyle (Central Council representative), A. Wilkerson (hon. secretary), with T. W. Chapman (Nuneaton), and F. Pervin (Stoke-in-Coventry). Mr. J. Oldham represented Messrs. Taylor and Co., the founders. The band stood as follows:—Messrs. A. Roberts 1, H. Argyle 2, E. H. Adams 3, J. Oldham 4, T. W. Chapman 5, A. Wilkerson 6, F. E. Pervin 7, J. George 8. Upwards of 50 ringers were present during the afternoon and evening from Allesley, Birmingham, Burton-on-Trent, Coventry, Croft, Exhall, Leicester, Loughborough, Northampton, Nuneaton, Rugby, Sharnford, Stoke-in-Coventry, Wolsey and Warwick. What the number would have been had the opening been on a Saturday is difficult to tell. Everyone present was greatly impressed with the 'tone' and 'go' of the bells, several of the experts dubbing the peal the finest octave in the county, and the founders are to be congratulated on the excellent spire they have made. The selected band of ringers were invited to tea on the vicarage lawn, in company with the large number of inhabitants and others assembled. The methods rung during the afternoon and evening included London, Bristol, Cambridge and Superlative Surprise, Double Norwich, Plain, and Kent Treble Bob, Grandsire and Stedman Triples.

The bells were lowered in peal about 8 p.m., after which Mr. H. Withers, of Birmingham, performed on the chiming apparatus, which has also been installed.

It was a red-letter day for the villagers, and one that will be remembered for many years to come.

## ESSEX ASSOCIATION.

A quarterly meeting was held at South Weald, on Saturday, June 11th. Many members were present from Brentwood, Barking, Romford, Ingatestone, Shenfield, Maldon, Chelmsford, Writtle, and the local company. Service was conducted by the Vicar (the Rev. Kirby), assisted by the Rev. Hensman, of Bentley, who gave an excellent address.

Tea was held at the Tower Arms, and was followed by the usual business meeting.

Four new honorary members were elected, and two ringing members and nine probationary members, including four ladies from Brentwood.

It was proposed to hold the next meeting at Great Waltham.—Votes of thanks were passed to the Vicar for the use of the bells, the Rev. Hensman for his most excellent address, and Mr. A. E. Halls for presiding at the organ.

## NEW METHODS.

## CREDIT WHERE CREDIT IS DUE.

## To the Editor.

Dear Sir,—Not long ago, I read an account of a gentleman who congratulated Edison on the invention of the electric bulb. The great scientist replied that it was not an invention, but a discovery. 'We knew,' said he, 'exactly what we wanted, which was a carbonised filament that would last for a thousand hours' use in a vacuum, and we set to work and carbonised everything that we could lay our hands upon until we found it.'

Now this is very true, but is no reason why Edison should not be given the credit of his discovery.

The idea put before the Central Council by Mr. Trollope is no new one. The old Greeks used to hold debate on the question: 'Was Hercules in the marble before the sculptor began to cut it?' But even allowing that he was, we must still allow credit to the sculptor for the beauty of the statue when he had removed all the stone that he did not require for his effect.

When Mr. Trollope says that all the methods have been worked out, he is making a very wide statement. I believe that all the Plain methods on eight bells have been produced, and a great many of those with a Treble Bob Hunt, but not all; a much larger number still remains to be investigated, and there is still plenty of work for the artist to find that which is good, and will be for a long time. For it will take the wholesale manufacturer a great many years yet before he has produced them all, good, bad and indifferent.

Take the case of Crofton Surprise as an example. I knew what I wanted before I set to work to discover it: A method in which the work of the bells 1-2 and 7-8, should show the beautiful symmetry that they here display, but I had to work out a great many methods before I found one that would produce a peal.

So much for eight bells, but what shall we say when we turn to ten and twelve? London Surprise Royal was possible from the days of the creation; but it took me nearly thirty years to discover it, and I was by no means the only one who was seeking it. Does Mr. Trollope mean to say that no credit is to be given to the men who spend their time and patient labour on producing methods that are excellent on ten and twelve bells?

The wholesale manufacturer cannot help us here. It takes 37 years to ring all the changes on twelve bells, but it would take more than ten times that time to produce all the methods.

If we are to have the very best possible, we must fall back upon the artists to produce them, and those who do get them are as worthy of receiving credit for their discoveries as were the men who produced the old Standard Methods.

Just one more word with regard to invention. There is still room for it. The man who first produced Oxford Treble Bob was an inventor. Others have discovered new methods that would fit in to the skeleton that he had drawn up. So we can have new skeletons invented, for which new methods may be discovered. No. II. is an example of this.—Yours truly,

E. BANKES JAMES.

**SOUTHWELL BICENTENARY.****ABRAHAM RUDHALL AND HIS BELLS.**

On Saturday week the bicentenary of the casting of Rudhall's peal of bells in Southwell Cathedral was celebrated by a meeting of the Midland Counties Association. A peal of bells, cast by Thomas Clay, of Leicester, had been hung in the tower in 1712 to replace those lost in the previous year by fire. These bells apparently did not meet with the approval of the inhabitants, and a subscription was raised to have the bells recast. Abraham Rudhall, of Gloucester, was entrusted with the task, and he undertook (so we read in Mr. W. A. James' little history of the Cathedral bells) after the eight old bells were delivered to him at Budley (now spelt Bewdley), to melt them down and make a new peal 'that shall be in the judgment of any three or more understanding and judicious persons in music, as good and tuneable and have as sweet and harmonious notes or tones as the bells at Newark,' which were lately cast by the said Abraham Rudhall, the whole to cost £100. In due course the old bells went to Bewdley and thence down the Severn to Gloucester, were recast and returned to Bewdley and eventually put up in the Minster.

On 25th August, 1721, Rudhall wrote the following letter:—

'To the Revd. Mr. Timothy Cary, Residentiary at Southwell near Newark upon Trent in Nottinghamshire, via London, Gloucester, ye 25 of Aug. 1721.

'Humble Servant,

'Abr. Rudhall Junr.'

Some 60 ringers were present at the bicentenary celebration, and were welcomed at the tower by the Rector (the Ven. W. J. Conybeare), who himself rang the treble to a touch of Grandsire Triples. Touches of Stedman Triples, Kent Treble Bob and Double Norwich Major followed, and afterwards the Rector presided at tea, being supported by the Rev. C. J. Sturton (Orston), the Rev. F. J. Wilkinson (Mansfield), Mr. Pryce Taylor (of the Loughborough Foundry), Mr. T. H. Kirkby (hon. secretary of the district), Mr. W. E. White (late secretary of M.C.A.), and members from Caythorpe, Cotgrave, Bolsover, Daybrook, Beeston, Nottingham, Long Bennington, Loughborough, Worksop, Swanwick, Mansfield, Retford, Mansfield Woodhouse, Sutton-in-Ashfield, Orston and Radcliffe-on-Trent.

On returning to the tower, the Rector spoke of the occasion upon which they had all met, and mentioned that the Cathedral Library contained the letter (quoted above) sent to the Residentiary in 1721, giving the day that the bells would arrive after being recast. The Rector thanked the members most heartily for their presence, and mentioned that he himself began to ring at nine years of age, but, unfortunately, he was pulled up by a rope and came down on a window ledge. Although severely shaken, he escaped unhurt. It damped his ardour, and he did not ring again for about three years; then he again

took up the art as keenly as ever. He also spoke of change ringing being very peculiar to England, although it was extending to the Colonies, as he had had the pleasure of ringing in New South Wales. Bell ringing and the brotherhood of bell ringers wielded a great influence in the Church, a great bond existing amongst the associations or brotherhood working together. The Rector thanked them, too, on behalf of the local ringers who were trying to take their place along with other towers, and he was very grateful to them for keeping the bells going for Sunday services. During the war they rarely heard more than six going, but he (the Rector) was glad when he heard eight again. That told us the war was over, and the ringers coming home. In conclusion, he thanked the hon. secretary (Mr. T. H. Kirkby) for helping to make the arrangements with the members.

Mr. T. H. Kirkby proposed a vote of thanks to the Archdeacon for presiding, and the local band for the tea arrangements.

The Rev. F. J. Wilkinson, of Mansfield, seconded, saying how pleased they were at the invitation extended to them to celebrate the bicentenary of the bells.

**CHESTER DIOCESAN GUILD.****STOCKPORT BRANCH.**

The Stockport Branch held its third meeting of the year, at Rostherne on Saturday last, when about 30 members and friends attended.

The Vicar (the Rev. T. A. Hanson) conducted the service in the church, and gave an interesting address. Tea was served in the Parish Room, and was followed by the usual business meeting.—Mr. W. Wolstencroft presided, in the absence of the branch chairman, and in opening the meeting, gave a few words of encouragement to the young members of the local band, who were enrolled members of the Guild only at the last meeting, held on May 7th.—The Hon. Secretary (the Rev. A. T. Beeston) endorsed the words of encouragement given by the chairman, and apologised for the absence of the Vicar, who had expressed his pleasure at the visit of the Guild to Rostherne, members being present from the neighbouring branch of Graffenhall, the pleasure which their company afforded was remarked upon. The Hon. Secretary went on to mention his position on the Literature and Press Committee of the Central Council, and asked that all who could, would assist him by bringing to his notice any detrimental report on bells and ringers which appeared in the columns of the Press.

A letter of apology regretting his absence from the branch chairman was read.

Taxal was fixed as the place of the next meeting, to be held either on October 1st or 8th, whichever the hon. secretary may find the more convenient date.

Two new members were elected, one being the twelve-year-old daughter of the chairman of the meeting.

Votes of thanks were accorded to the authorities for permitting the meeting to be held and for the use of the bells, and to all who assisted in making the meeting a pleasant one.

Rostherne is a picturesque and pleasant village, situated in a delightful part of the country, which is now looking its best. It is ornamented by a large and beautiful sheet of water called 'Rostherne Mere,' and on its steep banks stands the venerable pile dedicated to St. Mary, ascertained to have been built previous to the twelfth century. The tower is of stone, erected in 1538. It was rebuilt in 1742, and contains a heavy ring of six bells, tenor 20cwt. These were well requisitioned during the war—the methods rung ranging from Cambridge Surprise down to Doubles. Looking over the Mere from the churchyard a splendid view presents itself, while, as the bells 'stand,' and the last notes die away, the echo across the water is heard, at least a whole pull after, like the notes of an organ dying away.

J. P. F.

**STOW & DISTRICTS ASSOCIATION.**

A meeting of the above was held at Hilgay (Norfolk), on Saturday, June 4th. Members were present from Thelford, Fincham, Stow, Wallington, Denver, Gaywood, Terrington St. John, Shouldham, and the local company. Touches of Oxford Treble Bob and Bob Major were rung during the afternoon and evening, and 21 members sat down to tea. The usual business followed, presided over by the Rector. It was decided to hold the next meeting at Gaywood, on Saturday, July 16th.—A hearty vote of thanks was accorded the Rector for the use of the bells, also for presiding over the meeting.

**BARLEY RINGERS AMONG THE BELLS.**

On Saturday, June 11th, the Barley ringers, belonging to the Hertford Association, went for a ringing tour. Starting at 7.30 a.m., with a short touch of Grandsire at their own parish church, they proceeded on cycles to the towers of Great Chishill, Herdon, Elmdon, Christball, Wenden's Ambo, Littlebury, Ickleton and Stapleford. Touches of Kent Treble Bob Minor, Plain Bob Minor, Stedman Doubles, Grandsire Doubles, etc., were rung during the day. One of the Barkway band also accompanied them, and a very pleasant day was spent amongst the bells. The Barley ringers wish to thank the clergy for the use of the bells, and also the ringers for the hearty reception given them.

**YORKSHIRE ASSOCIATION.****VISIT OF MR. GABRIEL LINDOFF**

The quarterly meeting of the Southern District was held at Doncaster on Saturday last, and, considering the restricted travelling facilities, was very well attended, about 40 members being present from Adwick-le-Street, Arksey, Bolsterstone, Sheffield, Rotherham, Rawmarsh, Selby, Tickhill, Treeton, Wortley, and the local band.

The meeting was honoured by a visit from Mr. G. Lindoff, of Dublin, who was spending a short holiday in the neighbourhood, and good practice was obtained in the following methods: Grandsire and Stedman Triples, Bob Minor, Bob Major, Kent Treble Bob Major, and Double Norwich. Owing to only six having sent in their names no tea could be arranged, but all were able to be supplied at the cafes in the town.

The business meeting was held in the ringing chamber, the vice-president (Mr. F. Willey) being in the chair.

Mr. Brearley, of Bolsterstone, gave the association a cordial invitation to visit that place for the next meeting on Saturday, September 17th, and this was accepted.

Six new members were elected to the association, these being Messrs. W. Noble, Rammoor; J. Hewitt, Wragby; L. Beardsmore, Arksey; and J. H. Humphries, W. Ashman, A. Tomlinson, of Eckington. A short service was held in the church, conducted by the Vicar (the Rev. Archdeacon Sandford, M.A.). In a brief and interesting address the Archdeacon, after welcoming the association to his Parish Church, touched upon the work of the new Parochial Councils, and referred to the interesting fact that the organist and ringers were not under the control of that Council, but were under the charge of the Vicar and him alone. The assistant organist, Mr. P. Saville, officiated at the organ, which added to the enjoyment of the service, and at the close he kindly played two selections on this very fine instrument, which is one of the few in England which have five manuals. The brief service was very much enjoyed by those present.

A hearty vote was accorded to the archdeacon for the use of the bells and for his address, to the organist for his kind services, and to the local company for having everything in readiness. The bells were kept going in the various methods until 9 p.m.

**PRESS ATTACKS ON RINGING.**

*To the Editor.*

Dear Sir,—I wish to correct at the earliest moment your view of what I said at the C.C. meeting re 'Attacks on ringing in the Press.' What I tried to say was that we had found it best not to reply at all, as replies only brought more complaints. Trusting you will make this correction.—Yours truly,  
W. A. CAVE.

**WEDDING BELLS.**

At the Church of St. George and Mary, Cockington, Devon, on Wednesday, June 1st, a quarter-peal of Grandsire Doubles (1,260 changes) was rung in 45 minutes, to celebrate the wedding of Mr. J. Mayne to Miss Horwill; also of Miss Olive Browning, eldest daughter of Mr. G. Browning, captain of the local band, to Mr. C. Buckley, of Witham, Essex. The ringers were: William Dilling 1, Alfred W. Bowers (conductor) 2, James Olding 3, John Hawes 4, Frederick Plymso 5, John Blight 6. First quarter-peal for treble, 4th, 5th and 6th.

**A RINGERS' OUTING.**

The annual outing of the Bonvilston Guild of Ringers took place on Saturday, June 11th. Several friends were invited, and it was a merry party that set out for Porthcawl, despite the gloomy appearance of the weather. The drive down by charabanc being somewhat chilly, the party felt the need of some brisk exercise. This need was met by taking a sharp walk over the golf links, and when the members returned to dinner, a hearty meal was made.

The afternoon was spent in visiting the quaint old Church of Newton Nottage. Touches of Doubles were rung, and then the party adjourned to tea. The remainder of the time was spent in various ways. In the cool of the evening, the return journey was begun. This was done fairly early, as the band wished to visit Bridgend tower, which possesses a fine peal of eight. The ringing here was thoroughly enjoyed, the only regret being that more time could not be spent in the tower. Thanks are due to those who were responsible for obtaining the bells, both at Bridgend and Newton Nottage.

**WARWICKSHIRE GUILD.**

A meeting of the Warwickshire Guild was held at Wolvey on Saturday, May 21st. The weather was gloriously fine, and enabled most of the members who attended to cycle. Ringers were present from Allesley, Coventry, Croft, Higham, Hinckley, Nuneaton, Sharnford, Stoke Golding, Stoke Coventry, Stoney Stanton, and the local band. The methods rung during the afternoon and evening were Grandsire and Stedman Doubles Cambridge Minor, Oxford Treble Bob, Double Court, Double Oxford, Double Bob, Double Stedman, Slow Course and Plain Bob.

The Ringing Master and Hon. Secretary personally thanked the Vicar for his kindness in allowing the use of the bells, and the Vicar said he was pleased to welcome the Guild, and hoped to have the pleasure of seeing them again.

**NOTICES.**

### IN MEMORY OF THE DEAD.

On Saturday last, at Ranmore Church, Sheffield, a quarter-peal of Double Norwich Major was rung in 47 mins., by: Sam Thomas (conductor) 1, G. M. Thorpe (first in the method) 2, J. Osguthorpe (first in the method) 3, J. E. L. Cockey 4, Francis Ward 5, J. Evinson 6, W. Bugar 7, Charles Hayner 8. This was rung with half-muffled clappers (subsequent to the failure of an attempt for a peal of Grandsire Triples by the same band), previous to the dedication by the Lord Bishop of Sheffield of a memorial cross and tablet, in honoured memory of the 60 men of Ranmore, who laid down their lives for their country in the great war. Several well-struck touches of Stedman Triples were also brought round before and after the dedication, in which Messrs. J. Holman, R. W. Collier (T. O'Hara), and A. Hayner also took part.

WHITTLE-LE-WOODS, CHORLEY. — At St. John's Church, on Sunday, May 22nd, on the occasion of the unveiling of a memorial tablet to the memory of the fallen of the parish, who included four ringers, half-muffled touches of 504 Grandsire and 224 Plain Bob were rung for morning service, and for evening service a touch of 1,008 Plain Bob was brought round in 40 mins. The following ringers took part in each touch: E. Coxhead 1, R. Lancaster 2, H. Lucas 3, C. Salisbury 4, G. Bradley 5, V. Blackwell 6, W. Lancaster 7, A. Blackwell 8. This latter touch was the longest rung by ringers of 1, 2, 3 and 4, and also for No. 7 as conductor.

KINGS NORTON, WORCESTERSHIRE. — On April 16th, a quarter-peal of Stedman Triples: H. Withers (conductor) 1, H. Williams 2, J. Withers, jun. 3, W. Ball 4, E. Ollaway 5, C. H. Webb 6, J. Withers 7, J. Johnson 8. Rung as a birthday compliment to Mr. Johnson.

BARTON-IN-FABIS. — On Wednesday, April 27th, in 23 mins., 720 Bob Minor, also 180 Double Court: E. Chamberlain 1, F. Priestly 2, C. Payne 3, W. Brown 4, J. W. Priestly 5, F. J. Tite (conductor) 6. First 720 by all except the conductor, also first on the bells by a local band.

HERTFORD. — Hertfordshire Association and the Hertford College Youths. — For confirmation service by the Bishop of St. Albans, a quarter peal of Stedman Triples, 1,260 changes, in 46 mins.: A. E. Crensey 1, R. Dore 2, V. Neale 3, G. Gray 4, J. Ladley 5, A. Wright 6, Col. H. Baker (conductor) 7, A. E. Akers 8. First quarter-peal of Stedman by all except the conductor, who is to be congratulated on the progress of the band under his tuition.
